Dear Mr. Daron R. Haddock,

In reply to your recent letter of September ,8 2006 concerning posting a Reclamation Surety on the Dolomite Stone Claim, please be advised that I, Stephen Laub, Small claim operator have already been working to comply with the State of Utah Department of Natural Resources— Division of Oil, Gas, and Mining to reseed the disturbed area. The quarry site has already been reseeded except for the small access road leading into the quarry. This small access road comes off from a B. L. M. Road which is currently completely washed out. My access road into the mine consists of 1 acre or less and is under advisement with Mr. Doug Jensen on the reclaiming of it. I am in the process at this time of coordinating through several telephone conversations with Mr. Doug Jensen, Reclamation Specialist/ Inspector. We are discussing various options. I also met personally with Russell Shriner of the B. L. M. in St. George, Utah at 2:00 pm Nov. 13, 2006.

After consulting with both of them I am in the process of bonding as well as reclaiming because I intend to keep the Dolomite Stone Claim. I have some information concerning the joint bonding with the U. S. Department of the Interior - B. L. M. and the Utah Department of Natural Resources— Division of Oil, Gas, and Mining. I am waiting for additional information that the B. L. M. said they would send to me.

I also have an appointment to meet with Mr. Doug Jensen at his next appointed schedule in the area.

Thank you,

Stephen Laub
